

D

Highest integration level of any accelerator path, per program

		L0	L1	L2	L3	L4	L5	evidence (Supplementary Table S27; cell text = evidence id)
PhyML	ML				E0790			configure.ac --enable-beagle, v3.2 to v3.3.20211118; manual: bootstrap unavailable, compatibility not maintained
GARLI	ML				E0388			README 2.2: BEAGLE build 'can make use of GPU accelerators'; BEAGLE README: experimental
PAUP*	ML			E0392				author's beagle-lib fork (last push 2026-03); BEAGLE README: experimental or in development
PAML codeml	ML			E0688				CuCodeML research release (branch-site model); no path in PAML itself
RAxML / RAxML-NG / PLL	ML	E0704						no path in raxml-ng at 36 tags; the lineage's ports are paper records (S24)
IQ-TREE	ML	E0703						no path at 60 tags
FastTree	ML	L0						no public repository; no record retrieved
MEGA	ML	L0						closed source; no record retrieved
HyPhy	ML	E0705						CMakeLists comment on OpenCL only; no OpenCL target in tags fetched
MetaPIGA	ML	L0						no public repository; no record retrieved
TreeTime	ML	E0741						no path at 51 tags
Tree-Puzzle	ML	L0						no public repository; no record retrieved
PHYLIP DNAml	ML			L2				GPU DNAml is a paper record (S24), not in a PHYLIP release
BEAGLE (library)	both		E0003					README client list, v2.1.3 to v4.0.1
CuPhylo (library)	both		E0695					repository README (last push 2019-08)
MrBayes	Bayes					E0745		configure.ac --with-beagle; BEAGLE README: supported client
BEAST	Bayes					E0003		BEAGLE README v2.1.3 to v4.0.1: supported client
BEAST 2	Bayes					E0003		BEAGLE README v3.1.2 to v4.0.1: supported client
RevBayes	Bayes			E0003				BEAGLE README: experimental or in development; BEAGLE 4.1 introduction
